

Welcome to HP Instant Ink Loop!

You have joined a community of HP Instant Ink users helping us improve environmental sustainability.

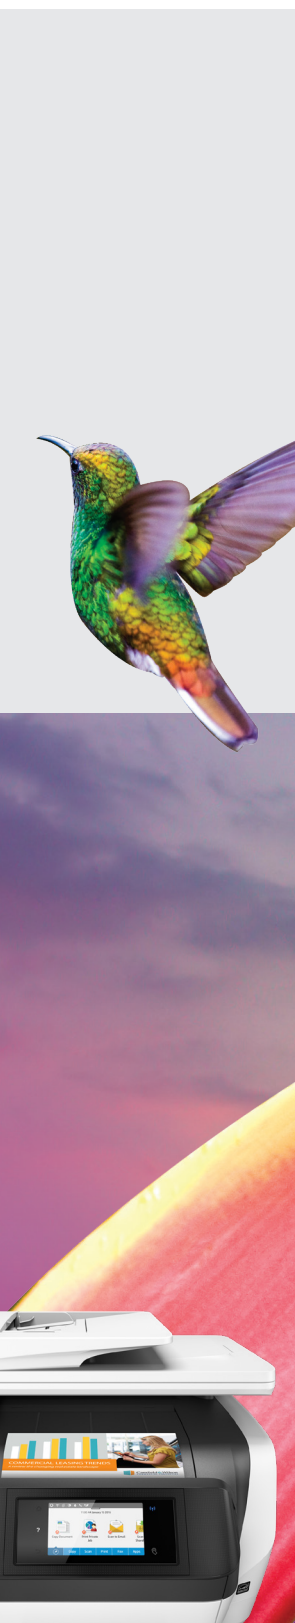

What to expect

The pilot programme takes effect the next time your printer tells HP you need more ink. The trial will run for approximately one year until June 2022.

This pilot incurs no additional cost to your current plan.

Pilot participants rely on your returns to enable multiple lives for each cartridge.¹ Please continue to use the HP Instant Ink recycling envelopes to send empty cartridges back to HP.

You might see slight scuffing or evidence of previous use on your HP Instant Ink Loop cartridges.

You're getting the same high-quality HP inks, but now with the environmental benefits of **fewer raw materials**—helping us reduce the impact on the planet.

Throughout the programme, starting after you receive your first replenishment, look for invitations to share your thoughts with us through online surveys.

You can opt out of the pilot programme at any time—just **call us at**

+49 703 1450 9010

and ask to be removed from the HP Instant Ink Loop pilot to resume your original HP Instant Ink service.

Thank you for joining us on our journey to creating a more sustainable future!

¹² Multi-life cartridges are responsibly collected after use and reconditioned at HP facilities, enabling multiple uses and reducing dependency on virgin plastics.
